

7 – CSS

Eric Mayhew & Jacob Errington

Now that participants have an understanding of how to create *content* in HTML, they will learn how to *style* their pages using CSS.

Overview

Learning objectives

By the end of this lesson, students will be able to:

- Explain syntactic elements of CSS: selectors and tags.
- Link CSS stylesheets with HTML documents.
- Use CSS to control various style properties (foreground/background text color, font size, margins, padding) of HTML elements.

Materials

To run this lesson, the following materials are necessary:

- The lesson slides, <https://www.computing-workshop.com/pdf/7-css.pdf>.
- Each participant needs to bring their computer, and needs a text editor installed on it.

Instructional sequence

Refer to the slides.
